Research, Read, and Annotate

<https://via.hypothes.is/https://hbr.org/2013/09/women-in-the-workplace-a-research-roundup>

According to this article, women are victims of sexism in employment for many reasons. They are paid less than men for the same positions, women are less likely to be promoted, and are given less recognition as partnering with their coworkers. I feel like this article was a very useful article to look at because it informs people and makes them aware of the inequity in the workplace. I feel like more people should know more about the issues certain policies create, so in the future these challenges companies create can be overcome.
