Be aware of biases & work to overcome them

Most of the peoples all around the world prejudge other peoples. And the reason that this thing happen is that peoples are different from each other. All peoples have different skin color, different religions , different language. But how can people be aware of biases of each others.The best way to achieve this goal is to WORK to overcome them.Being a successful person will make other peoples who prejudge you to be silent and think before they talk.A lot of peoples today are being prejudged by other people because of their skin color mostly.
