

Combat Climate Change Infographic

Combat Climate Change

The world is emitting 50% more CO2 per year than it did in 1990

Hydrofluorocarbons used in refrigerators are 10,000 more damaging than Carbon Dioxide

Between 1901 and 2001 the sea has risen by 19 cm.

For every one degree the world temperature rises by, global grain yields reduce by 5%

Lake Tahoe

A lake famous for its crystal clear cobalt blue water is losing its clarity

Global Warming is making the lake warm up much earlier in the year causing algae to bloom and reduce clarity
